CERTIFIED PUBLIC ACCOUNTANT

INDEPENDENT AUDITORS' REPORT

To the Board of Directors
Fern Bluff Municipal Utility District
Round Rock, Texas

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Fern Bluff Municipal Utility District as of and for the year ended September 30, 2017, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the Fern Bluff Municipal Utility District as of September 30, 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Change in Accounting Principle

As discussed in Note 1 to the financial statements, in 2015 the District adopted new accounting guidance, Govermental Accounting Standards (GASB) Statement No. 68, *Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27* and Governmental Accounting Standards (GASB) Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date – an amendment of GASB No. 68.* Our opinion is not modified with respect to this matter

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison information, schedule of changes in net pension liability and related ratios, and the schedule of contributions on pages 4 – 8 and 32 - 34 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards,* we have also issued our report dated January 17, 2018, on our consideration of the Fern Bluff Municipal Utility District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Fern Bluff Municipal Utility District's internal control over financial reporting and compliance

MANAGEMENT'S DISCUSSION AND ANALYSIS

FERN BLUFF MUNICIPAL UTILITY DISTRICT
MANAGEMENT'S DISCUSSION AND ANALYSIS
SEPTEMBER, 30, 2017

In accordance with Governmental Accounting Standards Board Statement 34 ("GASB 34"), the management of Fern Bluff Municipal Utility District (the "District") offers the following narrative on the financial performance of the District for the year ended September 30, 2017. Please read it in connection with the District's financial statements that follow.

For purposes of GASB 34, the District is considered a special purpose government. This allows the District to present the required fund and government-wide statements in a single schedule. The requirement for fund financial statements that are prepared on the modified accrual basis of accounting is met with the "Governmental Funds Total" column. An adjustment column includes those entries needed to convert to the full accrual basis government-wide statements. Government-wide statements are comprised of the Statement of Net Assets and the Statement of Activities.

OVERVIEW OF THE DISTRICT

The District is a political subdivision of the State of Texas, created by order of the Texas Water Commission (predecessor to the Texas Natural resource Conservation Commission) on June 10, 1986, under Article XVI, Section 59 of the Texas Constitution, and operates pursuant to Chapters 49 and 54 of the Texas Water Code, as amended. The District consists of approximately 689 acres of land.

The district is located approximately 16 miles north of the central downtown business district of the City of Austin and 3 miles west of the City of Round Rock, Texas and lies wholly within the exclusive extraterritorial jurisdiction of the City of Round Rock and within the Round Rock Independent School District. The District is comprised of two non-contiguous parcels of land. Access to the Fern Bluff and Stone Canyon subdivisions is provided by Interstate highway 35 from Austin to Ranch Road 620 to Wyoming Springs Road and access to Oak Brook subdivision is provided by Ranch Road 620 to Great Oaks Drive. The District was created to provide retail water, wastewater and drainage services to the lands within the District.

OVERVIEW OF THE BASIC FINANCIAL STATEMENTS

The District's reporting is comprised of five parts:

- Management's Discussion and Analysis (this section)
- Basic Financial Statements
  - Statement of Net Position and Governmental Fund Balance Sheet
  - Statement of Activities and governmental Fund Revenues, Expenditures, and Changes in Net Position
  - Notes to the Basic Financial Statements
- Required Supplemental Information
- Texas Supplemental Information
- Other Supplemental Information

FERN BLUFF MUNICIPAL UTILITY DISTRICT
MANAGEMENT'S DISCUSSION AND ANALYSIS
SEPTEMBER, 30, 2017

The *Statement of Net Position and Governmental Funds Balance Sheet* includes a column (titled "Governmental Funds Total") that represents a balance sheet prepared using the modified accrual basis of accounting. The adjustments column converts those balances to a balance sheet that more closely reflects a private-sector business. Over time, increases or decreases in the District's net position will indicate financial health.

The *Statement of Activities and Governmental Fund Revenues, Expenditures and Changes in Net Position* includes a column (titles "Governmental Funds Total") that derives the change in fund balances resulting from current year revenues, expenditures, and other financing sources or uses. These amounts are prepared using the modified accrual basis of accounting. The adjustments column converts those activities to full accrual, a basis that more closely represents the income statement of a private-sector business.

The *Notes to the Basic Financial Statements* provide additional information that is essential to a full understanding of the information presented in the *Statement of Net Position and Governmental Funds Balance Sheet* and the *Statement of Activities and Governmental Fund Revenues, Expenditures, and Changes in Net Position.*

The *Required Supplemental Information* presents a comparison statement between the District's adopted budget to its actual results.

COMPARATIVE FINANCIAL STATEMENTS

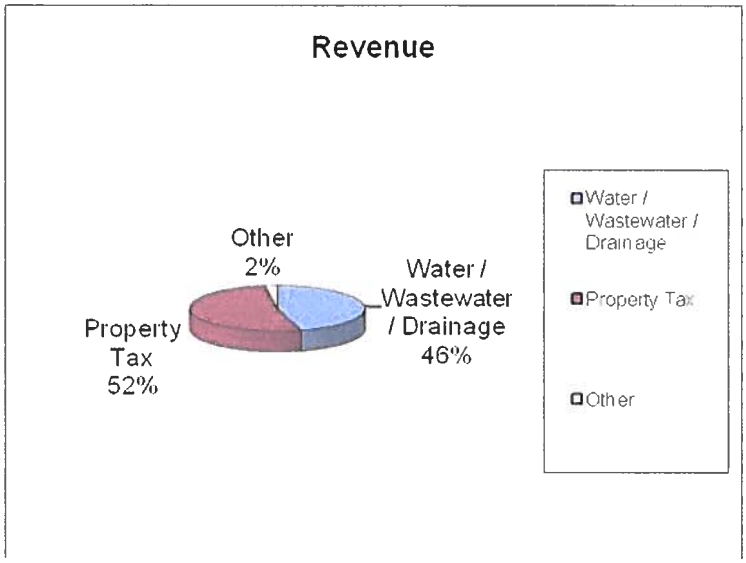

Statement of Net Position

	GOVERNMENTAL ACTIVITIES	
	2017	**2016**
Current and Other Assets	$ 5,225,588	$ 5,949,542
Capital and Non-Current Assets	$ 15,324,727	$ 14,583,341
Total Assets	**$ 20,550,315**	**$ 20,532,883**
Deferred Outflows of Resources	$ 1,569	
Current Liabilities	$ 1,665,592	$ 1,549,566
Long-term Liabilities	$ 2,392,049	$ 3,500,000
Total Liabilities	**$ 4,057,641**	**$ 5,049,566**
Deferred Inflows of Resources	$ 2,074	
Net Investment in Capital Assets	$ 11,629,884	$ 10,008,341
Restricted	$ 1,567,309	$ 1,337,064
Unrestricted	$ 3,292,927	$ 4,137,912
Total Net Position	**$ 16,490,120**	**$ 15,483,317**

The District's total assets were approximately $21 million as of September 30, 2017. Of this amount, approximately $ 15 million is accounted for by capital assets. The District had outstanding liabilities of approximately $5 million. $3.5 million represent bonds payable.

FERN BLUFF MUNICIPAL UTILITY DISTRICT
MANAGEMENT'S DISCUSSION AND ANALYSIS
SEPTEMBER, 30, 2017

The District's assessed value in 2017 was approximately S586 million compared to $563 million in 2016. The tax rate is set after reviewing tax rate projections, operation and maintenance requirements, and debt service requirements. The District's primary revenue sources are property taxes, and water / wastewater / garbage service fees.

Revenues were approximately $ 4.9 million dollars for the fiscal year ended September 30, 2017. Property taxes revenue provided approximately S 2.6 million dollars, and service revenue was approximately $2.2 million dollars. Total expenses were approximately S4.1 million dollars for the fiscal year ended September 30, 2017. Net assets increased approximately S750 thousand dollars.

Statement of Activities

	GOVERNMENTAL ACTIVITIES	
	2017	**2016**
Property Tax	$ 2,556,534	$ 2,475,296

MANAGEMENT'S DISCUSSION AND ANALYSIS
SEPTEMBER, 30, 2017

ANALYSIS OF GOVERNMENT FUNDS

	Government Funds by Year				
	2017	2016	2015	2014	2013
Cash	$1,507,720	$950,211	$829,587	$581,767	$569,114
Investments	$3,480,068	$4,817,351	$4,626,551	$4,401,113	$4,190,987
Receivables	$237,800	$181,980	$246,947	$258,491	$267,726
Deposits/Prepaids	$0	$0	$59,874	$0	$74,255
Total Assets	**$5,225,588**	**$5,949,542**	**$5,762,959**	**$5,241,371**	**$5,102,082**
Accounts Payable	$245,233	$179,211	$236,239	$254,686	$261,421
Refundable Deposits	$270,955	$269,030	$262,905	$265,841	$258,816
Deferred Revenue	$1,939	$1,166	$60,947	$975	$2,787
Other Payables	$37,465	$25,159	$24,599	$21,283	$20,931
Total Liabilities	**$555,592**	**$474,566**	**$584,690**	**$542,785**	**$543,955**
Restricted	$1,567,309	$1,337,064	$1,567,672	$1,179,021	$1,337,064
Unassigned	$3,102,687	$4,137,912	$3,610,597	$3,519,565	$3,221,063
Total Fund Balances	**$4,669,996**	**$5,474,976**	**$5,178,269**	**$4,698,586**	**$4,558,127**
Total Liabilities and Fund Balances	**$5,225,588**	**$5,949,542**	**$5,762,959**	**$5,241,371**	**$5,102,082**

The General Operating Fund pays for daily operating expenses. When comparing actual to budget, wastewater revenue varied from budget due to lower wastewater averages. Water expense varied from the budget because park irrigation water was not included in demand projections. More detailed information about the District's budgetary comparison is presented in the Notes to the Basic Financial Statements. The *Debt Service Fund* remitted bond principal of $1,075,000 and interest of $180,200. More detailed information about the District's debt is presented in the Notes to the Basic Financial Statements. The *Capital Project Fund* purchases the District's infrastructure.

CAPITAL ASSET AND LONG-TERM DEBT ACTIVITY

	Capital Assets (net)	
	9/30/2017	9/30/2016
Water/Wastewater/Drainage	$11,119,555	$11,482,224
Park Land & Improvements	$2,711,063	$1,797,510
Land	$1,248,242	$1,248,242
Furniture, fixtures, office equipment	$51,024	$50,535
Total	$15,129,884	$14,578,511

More detailed information about the District's capital is presented in the Notes to the Basic Financial Statements.

Long Term Debt

	Bonds Payable
Series 2004	$510,000
Series 2009	$985,000
Series 2011	$2,005,000
	$3,500,000

The District owes approximately $3.5 million dollars to bond holders. During the year, the principal balance was reduced by $1,075,000. More detailed information about the District's long term debt is presented in the Notes to the Basic Financial Statements.

CURRENTLY KNOWN FACTS, DECISIONS, OR CONDITIONS

The property tax base for 2017 is approximately $563 million dollars. The tax rate is $.4445 on each $100.00 of taxable value. Approximately 55% of the property tax will fund general operating expenses, and about 45% of the property tax will be set aside for debt service.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the District's finances and to demonstrate the District's accountability for the funds it receives. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the District in care of McGinnis Lochridge, LLP 600 Congress Avenue, Suite 2100, Austin, Texas 78701.

The accompanying notes are an integral part of these financial statements.

NOTES TO THE BASIC FINANCIAL STATEMENTS

FERN BLUFF MUNICIPAL UTILITY DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
SEPTEMBER, 30, 2017

1. SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies of the District relating to the funds and account groups included in the accompanying financial statements conform to generally accepted accounting principles (GAAP) as applied to governmental entities. Generally accepted accounting principles for local governments include those principles prescribed by the *Governmental Accounting Standards Board* (GASB), which constitutes the primary source of GAAP for governmental units. The more significant of these accounting policies are described below and, where appropriate, subsequent pronouncements will be referenced.

Reporting Entity – District was created, organized and established on June 10, 1986, by the Texas Commission on Environmental Quality (formerly the Texas Natural Resource Conservation Commission) pursuant to the provisions of Chapter 54 of the Texas Water Code. The reporting entity of the District encompasses those activities and functions over which the District's elected officials exercise significant oversight or control. A five member Board of Directors governs the District which has been elected by District residents or appointed by the Board of Directors. The District is not included in any other governmental "reporting entity" as defined by Statement No. 14 of the Governmental Accounting Standards Board, since Board members are elected by the public and have decision making authority, the power to designate management, the responsibility to significantly influence operations and primary accountability for fiscal matters. In addition, there are no component units as defined in Governmental Accounting Standards Board Statement No. 14 which are included in the District's reporting entity.

Implementation of New Accounting Principles – The District's basic financial statements for the fiscal year ended September 30, 2007 include certain financial statement disclosures required by GASB Statement No. 40, *Deposit and Investment Risk Disclosures.*

Basis of Presentation – Government-wide and Fund Financial Statements – The basic financial statements are prepared in conformity with GASB Statement No. 34 and include a column for government-wide (based upon the District as a whole) and fund financial statement presentation. Statement No. 34 also requires as supplementary information Management's Discussion and Analysis, which includes an analytical overview of the District's financial activities. In addition a budgetary comparison schedule is presented that compares the adopted and amended General Fund budget with actual results.

- **Government-wide Statements:**

  The District's statement of net assets includes both non-current assets and non-current liabilities of the district, which were previously recorded in the General Fixed Assets Account Group and the General Long-Term Debt Account Group. In addition, the government-wide statement of activities column reflects depreciation expense on the District's capital assets, including infrastructure.

1. **SIGNIFICANT ACCOUNT POLICIES (continued) –**

- **Government-wide Statements (continued):**
  The government-wide focus is more on the sustainability of the District as an entity and the change in aggregate financial position resulting from financial activities of the fiscal period. The focus of the fund financial statements is on the individual funds of the governmental categories. Each presentation provides valuable information that can be analyzed and compared to enhance the usefulness of the information.

- **Fund Financial Statements:** Fund based financial statement columns are provided for governmental funds. GASB Statement No. 34 sets forth minimum criteria (percentage of assets, liabilities, revenues or expenditures of either fund category) for the determination of major funds. All of the District's funds are reported as major funds.

Governmental Fund Types – The accounts of the District are organized and operated on the basis of funds, each of which is considered to be a separate accounting entity. The operations of each fund are accounted for with a self-balancing set of accounts that comprise its assets, liabilities, fund balances, revenues and expenditures. The various funds are grouped by category and type in the financial statements. The District maintains the following fund types:

- **General Fund** – The General Fund accounts for financial resources in use for general types of operations which are not encompassed within other funds. This fund is established to account for resources devoted to financing the general services that the District provides for its residents. Tax revenues and other sources of revenue used to finance the fundamental operations of the District are included in this fund.

- **Debt Service Fund** – The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest and related costs.

- **Capital Projects Fund** – The Capital Projects Fund is used to account for financial resources to be used for the acquisition or construction of major capital facilities.

Non-current Governmental Assets and Liabilities – GASB Statement No. 34 eliminates the presentation of Account Groups, but provides for these records to be maintained and incorporates the information into the government-wide financial statement column in the Statement of Net Assets.

1. **SIGNIFICANT ACCOUNT POLICIES (continued) –**

Basis of Accounting

- *Government-wide Statements* – The government-wide financial statement column is reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Property taxes are recognized as revenues in the year for which they are levied.

- *Fund Financial Statements* – The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. All governmental fund types are accounted for using a current financial resources measurement focus. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in the net current assets. Governmental funds are accounted for on the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recorded when susceptible to accrual (i.e. both measurable and available).

  "Measurable" means that the amount of the transaction can be determined and "available" means the amount of the transaction is collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period.

  Expenditures, if measurable, are generally recognized on the accrual basis of accounting when the related fund liability is incurred. Exceptions to this general rule include the unmatured principal and interest on general obligation long-term debt which is recognized when due. This exception is in conformity with generally accepted accounting principles.

  Property tax revenues are recognized when they become available. In this case, available means when due, or past due and receivable within the current period and collected within the current period or soon enough thereafter to be used to pay liabilities of the current period. Such time thereafter shall not exceed 60 days. Tax collections expected to be received subsequent to the 60-day availability period are reported as deferred revenue. Al other revenues of the District are recorded on the accrual basis in all funds.

  The District reports deferred revenue on its combined balance sheet. Deferred revenues arise when a potential revenue does not meet both the "measurable" and "available" criteria for recognition in the current period. In subsequent periods, when revenue recognition criteria are met the liability for deferred revenue is removed from the combined balance sheet and revenue is recognized.

1. **SIGNIFICANT ACCOUNT POLICIES (continued) –**

Budgets and Budgetary Accounting – A budget was adopted on September 9, 2016 for the General Fund on a basis consistent with generally accepted accounting principles. The District's Board of Directors utilizes the budget as a management tool for planning and cost control purposes. All annual appropriations lapse at fiscal year end.

Investments – Investments, consisting of United States treasury instruments and obligations in the State Treasurer's Investment Pool are recorded at cost, which approximates fair market value.

Capital Assets – Capital assets, which include Administrative Facilities and Equipment, Common and Recreation Areas, Water Production / Distribution system, Wastewater Collection system, Water Quality Ponds and Organizational Costs are reported in the government-wide column in the Statement of Net Assets. Public domain ("infrastructure") capital assets including water, wastewater and drainage systems, are capitalized. Items purchased or acquired are reported at historical cost or estimated historical cost. Contributed fixed assets are recorded as capital assets at estimated fair market value at the time received. Interest incurred during construction of capital facilities is not capitalized.

Capital assets are depreciated using the straight-line method over the following estimated useful lives.

Asset	Years
Administrative Facilities and Equipment	5 - 30
Common and Recreation Areas	5 - 30
Water Production / Distribution System	10 - 50
Wastewater Collection System	5 - 50
Water Quality Ponds	25
Organizational Costs	5

Interfund Transactions – Transfers from one fund to another fund are reported as Interfund receivables and payables if there is intent to repay that amount and if the debtor fund has the ability to repay the advance on a timely basis. Operating transfers represent legally authorized transfers from the fund receiving resources to the fund through which the resources are to be expended.

Long-Term Debt – Combination unlimited tax and revenue bonds, which have been issued to fund capital projects, are to be repaid from tax revenues of the District.

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities. Bond premiums and discounts as well as issuance costs, are deferred and amortized over the life of the bonds using the straight line method.

1. **SIGNIFICANT ACCOUNT POLICIES (continued) –**

Long-Term Debt (continued) –

Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Fund Balance / Net Position – Fund Balance and net position represent the difference between assets and liabilities. Fund balance reservations represent those portions of fund equity legally segregated for a specific future use. Designated fund balances represent tentative plans for future uses of financial resources. Unreserved fund balances represent fund equity available for use in future periods.

Net position is reported as restricted when there are limitations imposed on their use either through enabling legislation adopted by the District or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments.

2. EXPLANATION OF ADJUSTMENTS TO THE GOVERNMENTAL FUNDS BALANCE SHEET TO DERIVE THE GOVERNMENT-WIDE STATEMENT OF NET POSITION

Adjustments to convert the Governmental Funds Balance Sheet to the Statement of Net Position are as follows:

Fund balances - total governmental funds		$4,669,996
Capital Assets used in governmental activities are not financial resources and therefore are not reported in the governmental funds -		
Capital assets	26,544,225	
Less Accumulated depreciation	(11,414,341)	15,129,884
Revenue is recognized when earned in the government statements, regardless of availability. Governmental funds report deferred revenue for revenues earned but not available		0
Long-term liabilities are not due and payable in the current period and therefore are not reported in the governmental funds -		
Bonds payable	(3,500,000)	
Deferred charges, net of accumulated amortization	194,843	
Net Pension Liability	(2,049)	
Accrued Interest adjustment	0	(3,307,206)
Net position of governmental activities		$16,492,674

3. CASH AND INVESTMENTS

The investment policies of the District are governed by State statute and an adopted District Investment Policy that includes depository contract provisions and custodial contract provisions. Major provisions of the District's investment policy include: depositories must be FDIC-insured Texas banking institutions; depositories must fully insure or collateralize all demand and time deposits; securities collateralizing time deposits are held by independent third party trustees.

Cash – At September 30, 2017, the carrying amount of the District's deposits was $1,507,720 and the bank balance was $1,507,720. The bank balance was covered by federal depository insurance and other pledged collateral.

Investments –

Interest rate risk. In accordance with its investment policy, the District manages its exposure to declines in fair values through investment diversification and limiting investments as follows:

- Money market mutual funds are required to have weighted average maturities of 90 days or fewer; and
- Other mutual fund investments are required to have weighted average maturities of less than two years.

3. CASH AND INVESTMENTS (continued)

Credit risk. The District's investment policy requires the application of the prudent – person rule: Investments are made as a prudent person would be expected to act, with discretion and intelligence, and considering the probable safety of their capital as well as the probable income to be derived. The District's investment policy requires that District funds be invested in:

- Obligations of the United States government and/or its agencies and instrumentalities;
- Money market mutual funds with investment objectives of maintaining a stable net asset value of $1 per share;
- Mutual funds rated in one of the three highest categories by a national recognized rating agency; and
- Securities issued by a State or local government or any instrumentality or agency thereof, in the United States, and rated in one of the three highest categories by a nationally recognized rating agency; and
- Public funds investment pools rated AAA or AAA-m by a nationally recognized rating agency.

At September 30, 2017, the District held the following investments:

		Investment Rating	
Investment	Fair Market Value at 09/30/17	Rating	Rating Agency
Texpool Investment Pool	$ 3,480,068	AAAm	Standard & Poors
	$3,480,068		

The Texas Comptroller of Public Accounts is the sole officer and director of the Texas Safekeeping Trust Company, which is authorized to operate the state investment pool. The Comptroller maintains oversight of all operations of the pool.

Concentration of credit risk. In accordance with the District's investment policy, investments in individual securities are to be limited to ensure that potential losses on individual securities do not exceed the income generated from the remainder of the portfolio. As of September 30, 2017, the district did not own any investments in individual securities.

3. CASH AND INVESTMENTS (continued)

Custodial credit risk-deposits. Custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned to it. The government's investment policy requires that the District's deposits be fully insured by FDIC insurance or collateralized with Obligations of the United States or its agencies and instrumentalities. As of September 30, 2017, the District's bank deposits were covered as follows:

	Balance
FDIC insured deposits	$500,000
Collateralized deposits:	
Collateral held by pledging bank's trust department in the District's name	5,000,000
Collateral held by pledging bank's trust department, not in the District's name	
Uninsured and uncollateralized deposits	
Total deposits	$4,987,788

4. PROPERTY TAXES

Property taxes attach as an enforceable lien on January 1. Taxes are levied on or about October 1, are due on November 1, and are past due the following February 1. The Williamson County Appraisal District established appraisal values in accordance with requirements of the Texas Legislature. The District levies taxes based upon the appraised values. The Williamson County Tax Assessor Collector bills and collects the District's property taxes. The Board of Directors set current tax rates on September 8, 2017.

The property tax rates, established in accordance with state law, were based on 100% of the net assessed valuation of real property within the District on the 2017 tax roll. The tax rate, based on total taxable assessed valuation of $686 million was $0.4345 on each $100 valuation and was allocated to the General Fund and Debt Service Fund at $0.2445 and $0.19, respectively. The maximum allowable maintenance tax of $1.50 was established by the voters on June 30, 1986.

Property taxes receivable at September 30, 2017, consisted of the following:

	General Fund	Debt Service Fund	Total
Current year levy	$ 714	$ 587	$ 1,301
Prior years' levies	$ 79	$ 83	$ 162
	$ 793	$ 670	$ 1,463

4. PROPERTY TAXES (continued) –

The District is prohibited from writing off real property taxes without specific authority from the Texas Legislature.

5. INTERFUND ACCOUNTS

A summary of interfund accounts at September 30, 2017, is as follows:

	Interfund	
	Receivables	Payables
General Fund -		
Debt Service Fund	$1,797	
Capital Projects Fund	356,539	
Park and Capital Improvements	120,000	
Debt Service Fund -		
General Fund		1,797
Capital Projects Fund		
Capital Projects Fund -		
General Fund		356,539
Park and Capital Improvements		120,000
	$478,336	$478,336

6. CHANGES IN CAPITAL ASSETS

A summary of changes in capital assets follows:

	Balance 10/01/16	Additions	Deletions	Balance 09/30/17
Capital assets not being depreciated:				
Land	$1,248,242			$1,248,242
Total capital assets not being depreciated	$1,248,242	$0	$0	$1,248,242
Capital assets being depreciated:				
Common and Recreation Areas	5,482,499	1,228,883		6,711,382
Furniture, Fixtures and Office Equipment	258,425	47,881		306,306
Water, Wastewater and Drainage Facilities	18,278,295			18,278,295
Total capital assets being depreciated	24,019,219	1,276,764	0	25,295,983
Less accumulated depreciation for:				
Common and Recreation Areas	(3,684,989)	(315,330)		(4,000,319)
Furniture, Fixtures and Office Equipment	(207,890)	(47,392)		(255,282)
Water, Wastewater and Drainage Facilities	(6,796,071)	(362,669)		(7,158,740)
Total accumulated depreciation	(10,688,950)	(725,391)	0	(11,414,341)
Total capital assets being depreciated net of accumulated depreciation	13,330,269	551,373	0	13,881,642
Total capital assets, net	$14,578,511	$551,373	$0	$15,129,884

7. BONDED DEBT

The following is a summary of bond transactions of the District for the year ended September 30, 2017.

	Combination Unlimited Tax and Revenue
Bonds payable at October 1, 2016	$4,575,000
Bonds issued	0
Bonds retired	(1,075,000)
Bond premium amortization	0
Bond discount amortization	0
Bonds payable at September 30, 2017	$3,500,000

7. BONDED DEBT (continued)

Bonds payable at September 30, 2017, were comprised of the following individual issues.

Unlimited Tax and Revenue Refunding Bonds:

$3,390,000 – 2004 Waterworks and Sewer System Combination Unlimited Tax and Revenue Refunding Bonds payable serially through the year 2018 at interest rates which range from 2.500% to 3.875%

$4,435,000 – 2009 Waterworks and Sewer System Combination Unlimited Tax and Revenue Refunding Bonds payable serially through the year 2020 at interest rates which range from 3.00% to 4.00%

$2,730,000 – 2011 Waterworks and Sewer System Combination Unlimited Tax and Revenue Refunding Bonds payable serially through the year 2020 at interest rates which range from 2.00% to 4.00%

The annual requirements to amortize all bonded debt at September 30, 2017, including interest, are as follows:

	Annual Requirements for All Series		
Year Ended September 30, 2017	Principal	Interest	Total
2018	1,110,000	139,562	1,249,562
2019	1,175,000	95,800	1,270,800
2020	1,215,000	43,800	1,258,800
	$3,500,000	$279,162	$3,779,162

$1,019,317 is available in the Debt Service Fund to service the bonded debt. Bonds authorized but not issued amounted to $20,520,000 at September 30, 2017.

8. INTERFUND TRANSFERS

During the year, transfers of S0 were transferred from the Debt Service, Park & Capital Improvements, and Capital Projects Fund to the General Operating Fund. This transfer of surplus funds was for general operating expenses of the District.

9. COMMITMENTS AND CONTINGENCIES

On July 2, 1986, the District entered into an Agreement Concerning Creation and Operation of Fern Bluff Municipal Utility District with the City of Austin and Bill Milburn, Inc. The Creation Agreement provides initial authority for the District to issue its bonds and notes for the purposes of constructing the waterworks, sanitary sewer and storm systems for the District. The Agreement also provides for the provision of both temporary and permanent water and wastewater service to the District.

The District entered into a Water Supply Agreement with the City of Round Rock on August 22, 1991, whereby the City agreed to furnish water to the District. The District agreed to pay the City per month $1.76 per thousand gallons plus $10.485 times the number of water meter connections within the District.

The district has agreed to reimburse various developers for the cost of certain projects and advances to the extent allowed by the Texas Commission on Environmental Quality. The District is not obligated to reimburse the developers until bonds are issued. At September 30, 2007, the District developers have been substantially reimbursed and no further reimbursements are anticipated.

10. RISK MANAGEMENT

The District is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters. The District has obtained coverage from commercial insurance companies and the Texas Municipal League Intergovernmental Risk Pool (TML Pool) to effectively manage its risk. All risk management activities are accounted for in the General Fund. Expenditures and claims are recognized when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. In determining claims, events that might create claims, but for which none have been reported, are considered.

The TML Pool was established by various political subdivisions in Texas to provide self-insurance for its members and to obtain lower costs for insurance. TML Pool members pay annual contributions to obtain the insurance. Annual contribution rates are determined by the TML Pool Board. Rates are estimated to include all claims expected to occur during the policy including claims incurred but not reported. The TML Pool has established Claims Reserves for each of the types of insurance offered. Although the TML Pools is a self-insured risk pool, members are not contingently liable for claims filed above the amount of the fixed annual contributions. If losses incurred are significantly higher than actuarially estimated, the TML Pool adjusts the contribution rate for subsequent years. Members may receive returns of contributions if actual results are more favorable than estimated.

11. PENDING LITIGATION

There were no cases of pending litigation that would have a material effect on the financial statements at the fiscal year end of September 30, 2017.

12. Pensions

For purposes of measuring the net pension liability, pension related deferred outflows and inflows of resources, and pension expense, District specific information about its Fiduciary Net Position in the Texas County and District Retirement System (TCDRS) and additions to/deductions from the District's Fiduciary Net Position have been determined on the same basis as they are reported by TCDRS. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, which is when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. Information regarding the District's Total Pension Liability is obtained from TCDRS through a report prepared for the District by TCDRS consulting actuary, Milliman, in compliance with Governmental Accounting Standards Board (GASB) Statement No. 68, Accounting and Financial Reporting for Pensions.

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The District has the following items that qualify for reporting in this category.

- Pension contributions after measurement date – these contributions are deferred and recognized in the following fiscal year.
- Difference in projected and actual earnings on pension assets – This difference is deferred and amortized over a closed five year period.
- Difference in expected and actual pension experience – This difference is deferred and recognized over the estimated average remaining lives of all members determined as of the measurement date.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statements element, deferred inflows or resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The District has only one type of item, which arises only under a modified accrual basis of accounting that qualifies for reporting in this category. Accordingly, this item is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from two sources: property taxes and municipal court fines. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available.

The Fern Bluff MUD participates as one of the plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas County and District Retirement System (TCDRS). The funding policy governs how the Texas County & District Retirement System (TCDRS) determines the employer contributions required to ensure that benefits provided to TCDRS members are funded in a reasonable and equitable manner. The goals of TCDRS' funding policy are to fully fund benefits over the course of employees' careers to ensure intergenerational equity, and to balance rate and benefit stability with the need for the plan funding to be reflective of current plan conditions. This policy documents the current

12. Pensions (continued)

funding policies in effect for the Dec. 31, 2016 actuarial valuation as established by state law, administrative rule and action by the TCDRS Board of Trustees (the board). The policy serves as a comprehensive funding overview and complies with the GASB reporting requirements for an agent multiple-employer plan. TCDRS funding overview TCDRS is a model for responsible, disciplined funding. TCDRS does not receive any state funding. As an agent, multiple-employer plan, each participating employer in the system funds its plan independently. A combination of three elements funds each employer's plan: employee deposits, employer contributions and investment income. • The deposit rate for employees is 4%, 5%, 6% or 7% of compensation, as adopted by the employer's governing body. • Participating employers are required to contribute at actuarially determined rates to ensure adequate funding for each employer's plan. Employer contribution rates are determined annually and approved by the TCDRS Board of Trustees. • Investment income funds a large part of the benefits employees earn. Pursuant to state law, employers participating in the system must pay 100% of their actuarially determined required contributions on an annual basis. Each employer has the opportunity to make additional contributions in excess of its annual required contribution rate either by adopting an elected rate that is higher than the required rate or by making additional contributions on an ad hoc basis. Employers may make additional contributions to pay down their liabilities faster, pre-fund benefit enhancements and/or buffer against future adverse experience. GASB 68 Disclosure for Measurement Date December 31, 2015. 22 Fern Bluff MUD Texas County & District Retirement System. This work product was prepared solely for the TCDRS for the purposes described herein and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Milliman recommends that third parties be aided by their own actuary or other qualified professional when reviewing the Milliman work product. In addition, employers annually review their plans and may adjust benefits and costs based on their local needs and budgets. Although accrued benefits may not be reduced, employers may reduce future benefit accruals and immediately reduce costs. Methodology for determining employer contribution rates The board hires independent outside consulting actuaries to conduct an annual valuation to measure the funding status and to determine the required employer contribution rate for each employer plan. In order to calculate the employer contribution rate, the actuary does the following: • Studies each employer's adopted plan of benefits and the profile of its plan participants, and uses assumptions established by the board to estimate future benefit payments. • Discounts the estimate of future benefit payments to the present based on the long-term rate of investment return to determine the present value of future benefits. • Compares the present value of future benefits with the plan's assets to determine the difference that needs to be funded based on the funding policy. The valuation of each employer plan is based on the system funding policy and the assets, benefits and participant profile of each participating employer plan. The four key components in the determination of employer contribution rates are: the actuarial cost method, amortization policy, the asset valuation method and the actuarial assumptions. Actuarial cost method TCDRS has adopted the replacement life entry age cost method, a conservative cost method and an industry standard. The goal of this cost method is to fund benefits in an orderly manner for each participant over his or her career so that sufficient funds are accumulated by the time benefit payments begin. Under this approach, benefits are funded in advance as a level percentage of pay. This portion of the contribution rate is called the normal cost rate and generally remains stable from year to year. Amortization policy The portion of the contribution rate that funds any remaining unfunded amounts for benefits that are not covered by the normal cost is called the unfunded actuarial accrued liability (UAAL) rate. UAAL amounts occur when benefit enhancements are adopted that have not been funded in advance, or when actual investment or demographic experience varies from the actuarial assumptions (actuarial gains and

12. Pensions (continued)

losses). UAAL amounts are amortized on a level-percentage-of-covered-payroll basis over a closed period with a layered approach. The closed periods ensure all unfunded liabilities are financed over no more than 20 years from the time they occur. Each year new layers are established to amortize changes in the UAAL due to actuarial gains or losses, as well as any plan benefit changes elected by an employer for that year. Benefit enhancements are amortized over a 15-year closed period. All other changes in the UAAL are amortized over 20-year closed periods. These amortization periods are generally more conservative than those of most other public retirement plans and are stricter than the minimum amortization period required under state law. GASB 68 Disclosure for Measurement Date December 31, 2016. 23 Fern Bluff MUD Texas County & District Retirement System. This work product was prepared solely for the TCDRS for the purposes described herein and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Milliman recommends that third parties be aided by their own actuary or other qualified professional when reviewing the Milliman work product. For newly participating districts that have five or fewer employees who are all within five years of retirement eligibility, any initial UAAL and any subsequent adoption of prior service credits are amortized over a five-year closed amortization period. This ensures that benefits are appropriately funded over the current generation of employees. Notwithstanding the layered approach, the total UAAL payment may not be less than the required payment obtained by amortizing the entire UAAL over a 20-year period. If a plan is overfunded, the overfunded actuarial accrued liability (OAAL) is calculated annually using a 30- year open amortization period. Asset valuation method When determining the actuarial value of assets used for measuring a plan's funded status, TCDRS smooths each year's actuarial investment gains and losses and recognizes them over a five-year period to better reflect the system's long-term investment horizons and to keep employer contribution rates more stable. As actuarial asset investment gains and losses are recognized, they become part of the actuarial gains and losses for the year and are funded according to the amortization policy. The five-year period helps stabilize employer rates while still ensuring that rates are reflective of current market conditions. In addition, the board has the ability to set aside reserves from investment earnings that are used to help offset future negative economic cycles. These reserves are held separately and are not counted as part of a participating employer's plan assets until they are passed through to employers when determined necessary by the board. Reserves help maintain rate stability for employers. In addition, reserves ensure that employers do not adopt benefit increases based on a temporarily lower plan cost at a high point in a market cycle and, conversely, are not as pressured to immediately reduce benefit levels during a low point in a market cycle. Actuarial assumptions Demographic and economic assumptions are used to estimate employer liabilities and to determine the amount of funding required from employer contributions as opposed to investment earnings. These assumptions reflect a long-term perspective of 30 years or more. Examples of key economic assumptions include long-term investment return, long-term inflation and annual payroll increase. Demographic assumptions are the actuary's best estimate of what will happen to TCDRS members and retirees. Examples of demographic assumptions are employment termination rates, retirement rates and retiree mortality rates. A complete listing of all actuarial assumptions can be found in the annual system-wide valuation report. Oversight The board has established review policies to ensure that actuarial assumptions are appropriate and that the methodology for determining employer contribution rates is being correctly applied. Review of actuarial assumptions TCDRS' actuarial assumptions are periodically reviewed and revised as deemed necessary to reflect best estimates of future experience. Every four years, the TCDRS consulting actuary conducts an investigation of experience.

12. Pensions (continued)

TCDRS assumptions are compared to plan experience and future expectations, and changes to GASB 68 Disclosure for Measurement Date December 31, 2015. 24 Fern Bluff MUD Texas County & District Retirement System This work product was prepared solely for the TCDRS for the purposes described herein and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Milliman recommends that third parties be aided by their own actuary or other qualified professional when reviewing the Milliman work product. the assumptions are recommended as needed. The board adopts actuarial assumptions to be used in the valuation based on the results of this study. An actuarial audit of every investigation of experience is required and must be performed by an independent auditing actuary to review the consulting actuary's analysis, conclusions and recommendations for accuracy, appropriateness and reasonableness. These audits alternate between a peer review and a full replication audit of the investigation of experience. In a peer review audit of the investigation, the reviewing actuary uses the raw results of the investigation for demographic assumptions as calculated by the consulting actuary to test the conclusions and recommendations. In addition, the reviewing actuary independently analyzes economic assumptions to test the results and recommendations of the consulting actuary. The reviewing actuary also examines the consulting actuary's methods and assumptions for reasonableness and internal consistency. In a full replication audit of the investigation, in addition to performing all of the steps of a peer review, the auditing actuary fully replicates the calculation of the investigation's raw results. Review of employer contribution rates In order to test accuracy and ensure that the actuarial methods and assumptions are being correctly applied, an audit of the valuation is required every four years. These audits are conducted by an independent reviewing actuary and alternate between a peer review and a full replication audit of the valuation. In the peer review audit of the valuation, the actuary uses a sample of participant data and TCDRS plans to test the results of the valuation. The reviewing actuary also examines the consulting actuary's methods and assumptions for reasonableness and internal consistency. In a full replication audit of the valuation, the auditing actuary performs all the steps of a peer review audit but instead of analyzing sample data and plans, the auditing actuary fully replicates the original actuarial valuation. Review and modification of funding policy The board will review this policy on a regular basis and may modify this policy at its discretion. Modifications to the policy may be submitted for consideration to the board by staff and/or outside consulting actuaries as circumstances warrant.

The long-term expected rate of return on TCDRS assets is determined by adding expected inflation to expected long-term real returns, and reflecting expected volatility and correlation. The capital market assumptions and information shown below are provided by TCDRS' investment consultant, Cliffwater LLC. The numbers shown are based on January 2015 information for a 7-10 year time horizon. Note that the valuation assumption for long-term expected return is re-assessed at a minimum of every four years, and is set based on a 30-year time horizon; the most recent analysis was performed in 2013. See Milliman's TCDRS Investigation of Experience report for the period January 1, 2009 – December 31, 2013 for more details. (1) Target asset allocation adopted at the April 2015 TCDRS Board meeting. (2) Geometric real rates of return in addition to assumed inflation of 1.7%, per Cliffwater's 2015 capital market assumptions. (3) Includes vintage years 2006-present of Quarter Pooled Horizon IRRs. Noes to Schedule of Contributions

Valuation Date determined 12/31/2016

Notes

Valuation Date:

Notes Actuarially determined contribution rates are calculated as of December 31 and become effective in January 13 months later.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method	Entry Age Normal
Amortization method	Level percentage of payroll, closed
Remaining amortization period	19.3 years (based on contribution rate calculated in 12/31/2016 valuation)
Asset Valuation Method	5 year smoothed market
Inflation	3.0%
Salary Increases	Varies by age and service, 4.9% average over career including inflation.
Investment Rate of Return	8.00%, net of investment expenses, including inflation
Retirement Age	Members who are eligible for service retirement are assumed to commence receiving benefit payments based on age. The average age at service retirement for recent retirees is 61.
Mortality	In the 2015 actuarial valuation, assumed life expectancies were adjusted as a result of adopting a new projection scale (110% of the MP-2014 Ultimate Scale) for 2014 and later. Previously Scale AA had been used. The base table is the RP-2000 table projected with Scale AA to 2014.

Other Information:

Notes No changes in plan provisions are reflected in the Schedule of Emloyer Contributions.

CERTIFIED PUBLIC ACCOUNTANT

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Board of Directors
Fern Bluff Municipal Utility District

We have audited the financial statements of Fern Bluff MUD, as of and for the year ended September 30, 2017, which collectively comprise the Fern Bluff MUD' basic financial statements and have issued our report thereon dated January 17, 2018. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

Management of Fern Bluff MUD, is responsible for establishing and maintaining effective internal control over financial reporting. In planning and performing our audit, we considered the Fern Bluff MUD's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Fern Bluff MUD's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Fern Bluff MUD's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Fern Bluff MUD' financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of management, Board of Directors, others within the entity, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.
